About me

An engineering/computer science student attending The Ohio State University. I'm committed to my work and am dedicated to getting things done with efficiency and quality in mind. I'm currently exploring agentic development to be capable of even more.

Skills

Objective

Seeking a part-time or full-time summer position in a technical or creative role, especially one where I can leverage AI to improve my work output, as well helping others gain confidence with AI technology. As a quick learner and clear communicator, I can bring outsized value in a short period.

Education

Since 2024	Computer Science & Engineering - GPA: 3.7	The Ohio State University
	Artificial Intelligence Track	
2023-2024	College Credit Plus - GPA: 4.0	Columbus State Community College
	Calculus II & III Courses	
2020-2024	High School - GPA: 4.0 / ACT: 34	Upper Arlington
	Advanced Placement Calculus, English, and History	

Projects

2024-pres.	3D Open World Fantasy RPG Video Game
2020-pres.	Full analysis of congressional redistricting with 1000+ speculative maps
2021-2023	3D Open World Survival Video Game with detailed map of United States

Experience

2024	Model United Nations Invitational	Georgetown University
	Selected to sponsor resolution at internationally recognized conference	
2023	Technical Support	Local Real Estate Company
	Configured rental property pages on Zillow and Apartments.com. Performed other general technical support activities	
2020	Product Instructional Video	Payments Company
	Created video instructing client use of ecommerce tool	

Interests

- Geographical analysis of political trends
- Interactive systems design and 3D modeling related to game development
- Plugin editing and cleaning for game modification
- Agentic development using local LLMs and RAG
