2021-2023

Designed wildlife system with hundreds of animals, transportation system for land and water, hundreds of terrain nodules simulating entire continental US

Implemented interactive features for survival mechanics, resource gathering system, equipment system with animations

## EXPERIENCE

### Model United Nations

*North American Invitational*

Georgetown University

*2024*

Selected to sponsor resolution at internationally recognized conference

### Technical Support

*Part-Time*

Local Real Estate Company

*2023*

Configured rental property pages on Zillow and Apartments.com.

Performed various technical support activities

### Product Instructional Video

*Video & Audio Editing*

Payments Company

*2020*

Created video instructing client use of ecommerce tool

## INTERESTS

Geographical analysis of political trends

Interactive systems design and 3D modeling related to game development

Plugin editing and cleaning for game modification

Data Analysis

Agentic development using local LLMs and RAG
